DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

- ✓ - In claim 10, lines 2 and 3, delete --defining a feed point--;
- ✓ - In claim 12, lines 2 and 3, delete --defining a feed point--.

These changes were made to provide a proper antecedent basis in the claims.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Meise on 4/18/2005.

Allowable Subject Matter

Claims 1-22 are allowed.

Claims 1 and 13 recite an antenna comprising a plurality of planar conductors, each of the planar conductors defining a broad side and an edge, the plurality of planar conductors placed in an array with the broad side of each planar conductor parallel with the broad side of other planar conductors, and the edges of the plurality of planar conductors formed a discontinuous surface, a plurality of plated-through vias interconnecting the plurality conductors to define a matrix of conductors, and an electromagnetic radiating element located adjacent the surface and comprising an electrical conductor parallel with the surface.

None of the prior arts shows or suggests this antenna device.
